MD330 Firmware Upgrade SOP (Nintendo Switch 2 support update package)

1. Please visit the official website to download the latest firmware (FW) update package:
   "MD330 Firmware Upgrade Tool_3.1.17"
   (https://www.patriotmemory.com/products/md330-storage-hub)

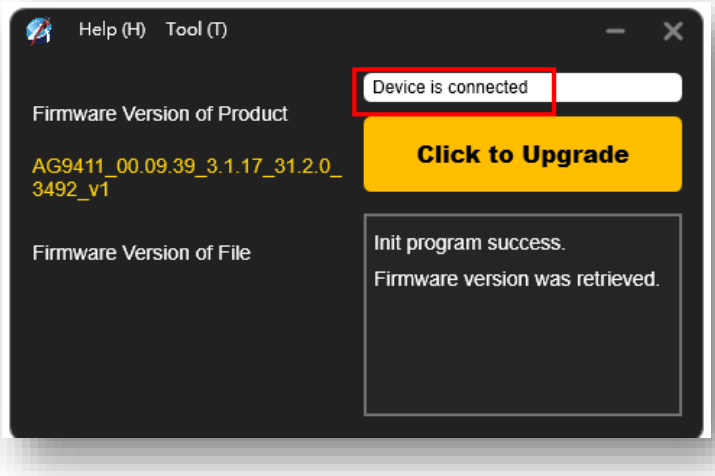

2. After extracting the downloaded file, please confirm that the three files shown in the reference image are present and located in the same directory.

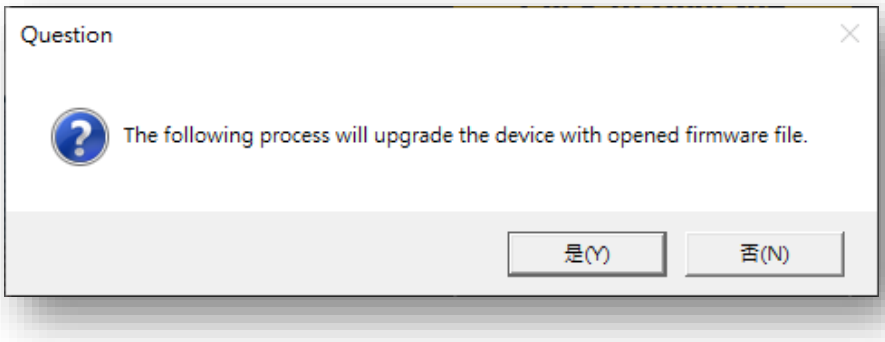

3. MD330 Connection Instructions (Refer to the illustration below)
   ❶ Connect the PD port to the computer's power port.
   ❷ Connect the MD330's Type-C connector to the computer.
   ⚠ Important:
   - The PD port and the Type-C connection must be connected to the same computer.
   - Please use a Windows PC to perform the firmware update.

4. **Once the MD330 is properly connected, the message “Device is connected” will appear. This indicates a successful connection (refer to the red box in the reference image).**

5. When the confirmation prompt appears, select “Yes” to proceed with the firmware update.

6. The appearance of the completion screen indicates that the firmware update has been successfully completed.
